Manufacturer & Exporter of Guar Gum Split & Powder
Government Recognised Export House Status

PRODUCT PROFILE

Sesbania Seed

SESBANIA SEED

The genus name Sesbania is a latinised version of the old name “Sesban” of Arabic origin.

Sesbania is a legume also known as a "Swamp Pea". It is great for duck marshes and quail. Sesbania makes a good cover for ducks and upland game birds, growing as high as 8-12 feet. It is one of the finest quality quail foods available. Dove and wild turkey also have a craving for Sesbania. Grows best in moist, heavy lands though will grow in most soils. In India seeds are sown in June-July at onset of southwest monsoon; sowings after September produce poor seed production. In southern United States seed broadcast after soil has been moistened by rains in April or May and harrowed. In India seed is usually broadcast, but sometimes drilled in rows of 30cm apart. Thicker planting facilities harvest of small plants. The crop is fast growing and needs little weeding.

Usually, no fertilizers are applied. In India, it is grown as main crop in rice rotation or as a border crop on the edge of rice fields. The seeds get ready to cut in September or October, but the fiber does not suffer if left standing until seed is ripe in November. In India seed matures in about 5-5 1/2 months; in the United States in about 2 months.

SPECIFICATION

SESBANIA SEED: (HS CODE : 12119099)

Color	Black, Green
Moisture	5% Max
Size	0.3 to 0.4 cm.
Ash Content	5 % (max.)
Heavy Metal	-
Iron	50 ppm (max.)

Arsenic	Nil
E-Coli	Absent
Packing	50 kg. Bag packing
